Hello everyone. So, last week before half term. Where has the time gone? I miss you all so much and I am so proud of what you have achieved over the last few months.

I want you to think about those achievements and I would like EVERYONE to tell me about something they have done that has made them feel proud. Tell me what it was you did, what made you do it (if anything), how did it make you feel, how did it make others feel and anything else you think is important. I would like to collect these and make a memory/time capsule of this time. Please, everyone take the time to do this. It will only take a short time and I would really love to hear all about something that has made you feel proud.

For English this week, I would like you to look at the picture I will post above. I would like you to do a 'free' write. By this, I mean you can choose what you write and how you write it. You could do a description, you could use this as a setting for a story, you would write a diary of a time you visited here. The choices are endless, all you need is your imagination. As always, send them to me. I love reading your work.

Maths – I would like you to focus on Place Value. Make some digit cards, 1 – 9 on scrap paper, then put them in a box or a bag. Start with three numbers, make the highest number you can, then make the lowest number. Repeat this several times. Then, when you are confident, try it with four digits and repeat.

Which digit is most important if you are making the largest/smallest number possible?
To make the highest possible number, where would it be best to put the highest/lowest digit card?
If you want to make the lowest number, where would it be best to put the lowest/highest digit card?
What makes a number odd/even?
What kind of number will the units digit need to be to make an even number? What about an odd number?

You could also play this game with a parent using the number cards.

Each of you draws a box like this -

Each person takes a turn to select a number (then put it back) and decide where to put it in your box. Whoever has the highest or lowest number wins. First one to 10 is the CHAMP!
